## MapServer

- <https://mapserver.org>
- OpenSource / OSGeo Software zur Bereitstellung von OGC-Diensten
- MIT-Lizenz
- Linux, Windows, Mac OS X
- cgi & MapScript
- sehr breit aufgestellt

## MapServer Tweet Dez. 2019

**MapServer**

@mapserver\_osgeo

12000 commits, quite a milestone!  
Thank you to all of the MapServer  
community and contributors (code,  
testing, docs, packaging,  
promoting, helping users on  
mailing lists). Credit to the  
developer 'bragef' for the big  
commit, ha!

## MapServer auf Open Hub

### In a Nutshell, MapServer...

- ... has had 13,868 commits made by 160 contributors representing 416,708 lines of code
- ... is mostly written in C with a low number of source code comments
- ... has a well established, mature codebase maintained by a large development team with increasing Y-O-Y commits
- ... took an estimated 110 years of effort (COCOMO model) starting with its first commit in April, 2000 ending with its most recent commit about 1 month ago

<https://www.openhub.net/p/mapserver>

## MapServer for Windows (MS4W)

**MS4W: open doors as well as windows**

MapServer for Windows (MS4W) is the popular and long-time installer for Windows users developed by [Gateway Geomatics](#), containing all you need to get moving fast with MapServer.

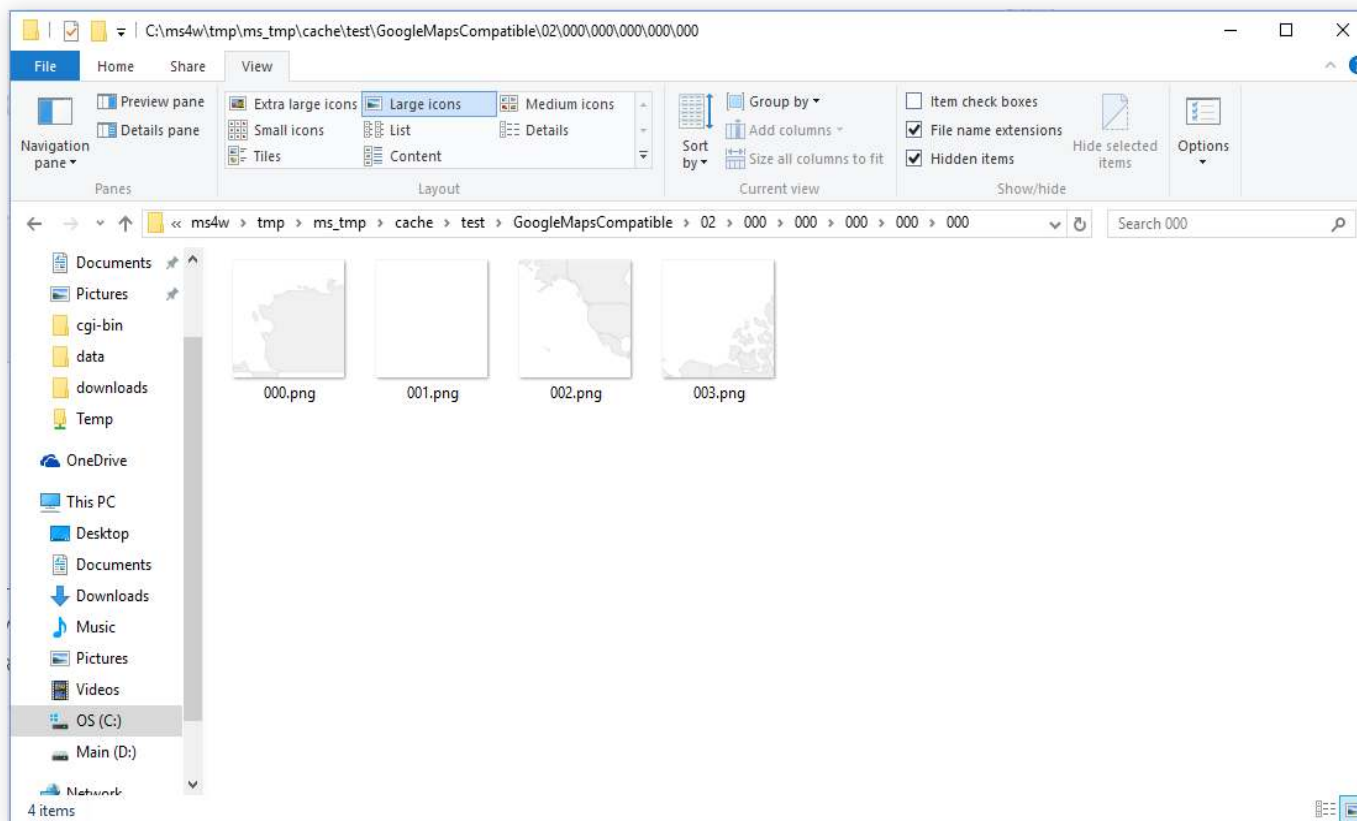

### Note

**MS4W 4.0.3 is released! Important security release for several libraries.**

Get it now!

<https://ms4w.com/>

## MapCache

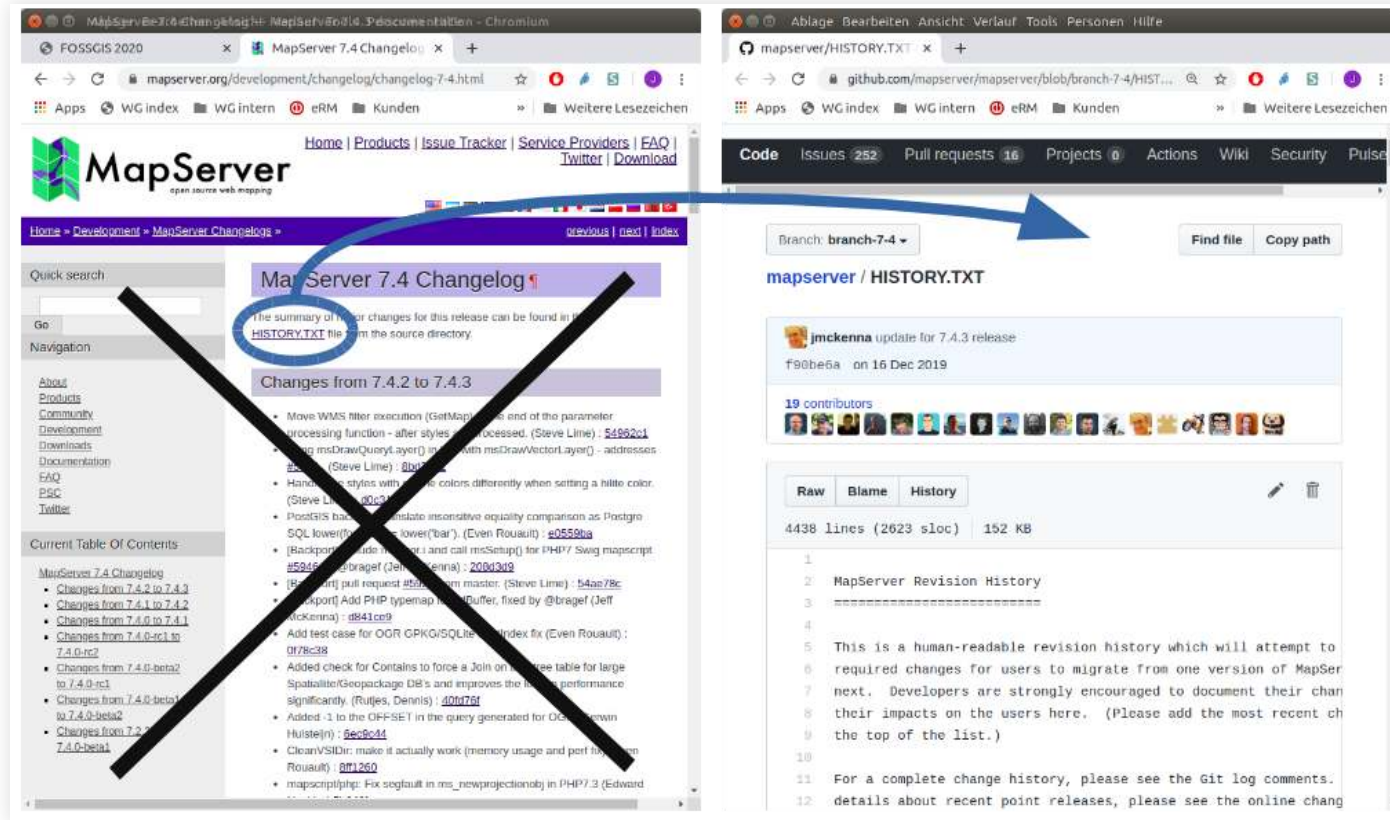

## Tiny OWS

```
MAP
  WEB
    METADATA
      "tinyows_schema_dir" "/usr/local/share/tinyows/schema/"
      "wfs_title" "TinyOWS service provided by a MapFile"
      "wfs_contact" "foo@bar.net"
    END
  END
  LAYER
    NAME 'France'
    METADATA
      'wfs_title' 'France'
      'wfs_namespace_prefix' 'tows'
      'wfs_namespace_uri' 'http://www.mapserver.org/tinyows/'
      'wfs_srs' 'EPSG:27582'
      'tinyows_table' 'france'
      'tinyows_writable' '1'
      'tinyows_retrievable' '1'
    END
    DUMP TRUE
  END
END
```

# MapServer History

The image shows two browser windows. The left window displays the MapServer 7.4 Changelog page, which is crossed out with a large black 'X'. A blue circle highlights the 'HISTORY.TXT' link in the text. The right window shows the GitHub repository for 'mapserver/HISTORY.TXT' on the 'branch-7-4' branch. A blue arrow points from the circled link in the left window to the 'branch-7-4' dropdown menu in the right window. The GitHub page shows a commit by 'jmckenna' from December 16, 2019, and a table with 'Raw', 'Blame', and 'History' tabs. The 'History' tab is selected, showing the file's size as 152 KB and 4438 lines of code.

<https://github.com/mapserver/mapserver/blob/branch-7-4/HISTORY.TXT>

## MapScript

Ist alt, aber PHP7 Support hat lange auf sich warten lassen.

## MapScript

Ist alt, aber PHP7 Support hat lange auf sich warten lassen.

ja schön, aber ... ähm... was ist das überhaupt?

und wofür brauche ich das?

## MapScript

Jeder Mapfile-Parameter ist dynamisch anpassbar.

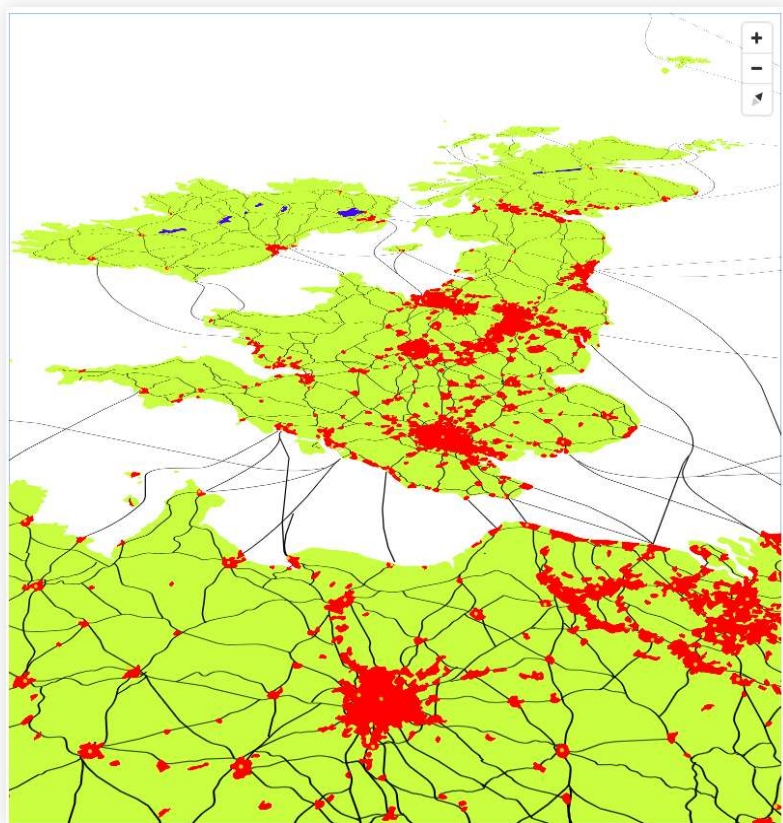

- Wirklich jeder.
- Auch die Parameter, die wir nicht aus den Attributen der Geodaten holen können.
- Auch die Parameter, die nicht über Variablen (runtime substitution, scaletoken) steuerbar sind.
- Es könne auch Daten zur Darstellung generiert oder von Webdiensten geholt werden.

## MapBox Vector Tiles

Konfiguration als neues Output-Format:

```
OUTPUTFORMAT
  NAME "mvt"
  DRIVER MVT
  #FORMATOPTION "EXTENT=512" # default is 4096
  FORMATOPTION "EDGE_BUFFER=20"
END
```

## MapBox Vector Tiles

<https://docs.mapbox.com/vector-tiles/reference/mapbox-streets-v8/>

## OGC-Filter im WMS GetMap-Request

```
/cgi-bin/mapserv?map=...  
&SERVICE=WMS  
&REQUEST=GetMap  
&LAYERS=popplace  
&FILTER=<filter><propertyisqualto><propertyname>NAME</propertyname>  
<literal>Digby</literal>  
</propertyisqualto></filter>  
&...
```

GetMap ohne Filter

GetMap mit Filter

## Composite Filters

```
LAYER
  COMPOSITE
    OPACITY 100
    COMPOP "darken"
  END # COMPOSITE
  ...
END # LAYER
```

## Layer Metadaten

[https://demo.mapserver.org/cgi-bin/wms?  
request=GetMetadata&layer=continents](https://demo.mapserver.org/cgi-bin/wms?request=GetMetadata&layer=continents)

```

## INSPIRE Support für WCS 2.0

```
WEB
METADATA
...
"wcs_languages" "eng,ger"
...
END
END
WEB
METADATA
...
"wcs_title.eng" "myservicetitle"
"wcs_title.ger" "Mein Dienst"
"wcs_abstract" "mylayerabstract" #fallback
"wcs_abstract.ger" "Meine Zusammenfassung"
...
END
END
```

## Coming soon

- [MapServer-8.0-Release-Plan](#)
  - rename shp2img utility to map2img
  - fully support PROJ 6+ (need lead)
  - fully support upcoming "OGC API", also called "WFS 3", standard
- [Mapfile-Syntax-Changes-for-8.0](#)
- Mai 2020: [https://wiki.osgeo.org/wiki/OSGeo\\_Community\\_Sprint\\_2020](https://wiki.osgeo.org/wiki/OSGeo_Community_Sprint_2020)

## Coming sooner

Von Jeff McKenna ★

Betreff **Re: [mapserver-users] cgi-error: End of script output**

An Jörg Thomsen (WhereGroup) ★

7.6.0 is likely end of Feb early March, close to FOSSGIS ha.

Thanks for the MS4W complements!!!

-jeff
